

# READY. SET. DIG.

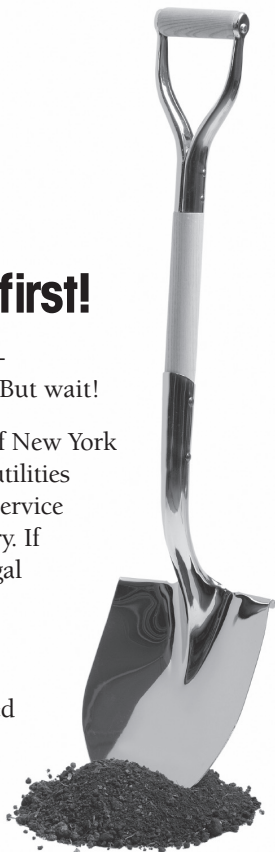

## Not so fast, call DigNet first!

Swimming pools, landscaping, a new fence—  
all reasons to break ground and get to work. But wait!

At least 48 hours before you dig, call DigNet of New York City & Long Island to have the underground utilities marked. This free service will help you avoid service interruptions, costly property damage, or injury. If contractors are doing the digging, it is their legal responsibility to call.
